

A photograph of a male teacher with a beard, wearing a checkered shirt and khaki pants, standing in a classroom. He is smiling and gesturing with his hands. Several students in the foreground have their hands raised. In the background, there is a chalkboard with cursive handwriting and a grid of small papers. A Centurion wireless security unit is visible in the lower right corner of the image.

CENTURION® WIRELESS SECURITY EDUCATIONAL FACILITIES

Where Centurion Fits in Education

According to The National School Safety Center, over the 5-year period 2002 to 2006, teachers were the victims of approximately 234,000 total crimes at school each year, including 144,000 thefts and 90,000 violent crimes. In schools, immediate communication is the key to a solid emergency response and security plan...the Centurion Wireless Security System is the answer. A teacher's call for help is a race against time. Seconds can mean lives, a fact that makes the Centurion's superior transmitting speed not only impressive but critical.

Features

- Transmits pinpointed voice/text messages without delay to two-way radios, pagers, landline or mobile phones, and/or text capable devices, enabling targeted response with real-time information. Centurion tells what is happening, when and where — as it is happening.
- Email Alarm History Log by Ethernet Interface to desktop, cell phone, pager, or other text capable devices.
- Capable of securing 255 locations with one stand alone unit.
- Centurion allows different communication paths to be programmed for each sensor.
 - Panic button #1 sends alert to teacher's pagers
 - Panic button #2 sends alert to School Resource Officer's two-way radio
- Centurion transmissions can be scheduled to automatically broadcast on differing devices (Radio 1, Radio 2, Phone, Pager) dependant upon the time of day.
 - For example, the message can be sent 9:00 am - 5:00 pm via pager and 5:01 pm - 8:59 am via phone
 - The message can be sent to multiple devices; different ones during each programmed period.
- Flash memory allows for effortless expansion of current system and upgrading of operating software via integrated modem.

Centurion

The Centurion Wireless Security System is the fastest wireless panic alarm system on the market, transmitting unique pinpointed messages without delay to faculty, staff and officers by way of two-way radios, pagers, phones, and email. The Centurion allows for two key things to take place:

1. Immediately alert teachers and school officials of what is happening, when, and where—as it is happening.
2. Simultaneously alert local law enforcement and SRO's of the volatile situation without any dispatch delay via two-way radio or phone.

Here's How It Works:

A location-specific voice message is recorded on the Centurion system. That message, which is triggered by a wireless duress button or other various sensors, is received by school staff and personnel by way of two-way radio, pager, phone (landline or mobile), and/or email in seconds. Staff members and school security officers know immediately where they're needed and how to react. At the same time, Centurion alerts law enforcement of the situation allowing them to respond without dispatch delay. Centurion tells what is happening, when, and where — as it is happening.

Technical Specifications

- 100% wireless Centurion adapts to the size and needs of any facility.
- Centurion system capability is easily scalable so it can grow as a facility's needs expand or change.
- 8 - 255 message capability
- System is password protected.
- 16-key keypad and LCD screen for simplicity and ease of use.
- Integrated "Flash Memory Upgrade" capability means your Centurion system can evolve easily with your needs.
- Sensor types include the following, and others, in any combination: duress button, motion detector, smoke detector, glass break detector, door window contact, temperature detector.
- System continuously monitors active sensors providing assurance of sensor monitoring performance. Sensor "tamper", "low battery" and "missing" events are monitored and recorded in Alarm History Log. Continuous "signal strength level" monitoring of events can be displayed on LCD.
- Built-in relays enable Centurion to activate 4 external systems (Lights, Video Cameras, Alarms, etc.)
- Operates from a standard 110V wall outlet. Integrated battery back-up feature ensures system operation in the event of a power outage.
- Two Year limited warranty
